TORINO

CONCEPTO FUNCIONAL

De gran versatilidad, permite fabricar armarios de grandes dimensiones mediante un herraje que puede soportar hasta 80 kg. por puerta y que permanece oculto tras las puertas.

Posibilita la fabricación de puerta de madera con un espesor máximo de 30 mm.

Incorpora perfilera de aluminio:

- Para tablero de 19 mm.
- Para tablero de 10-11 mm.
- Para vidrio 4-5 mm.

Con las que podemos realizar puertas completas de vidrio o combinaciones de vidrio-madera.

SUMMARY

These aluminum fittings make possible to manufacture large size closets, as they resist up to 80 Kg each door and keep the fitting hidden behind the doors.

It is possible to manufacture 30mm thickness board.

The system incorporates aluminium profile:

- For 19 mm. thickness panel.
- For 10-11 mm. thickness panel.
- For 4-5 mm. glass panel.

With those aluminium profiles you can manufacture glass doors or combine glass and wood.

MUNICH BZ

CONCEPTO FUNCIONAL

Este tipo de construcción permite que las puertas puedan quedar alineadas en un mismo plano, creando un efecto de continuidad visual en las puertas.

Permiten fabricar frentes de armario de gran amplitud donde el herraje queda oculto sin que se pueda apreciar ningún sistema de sujeción.

Una de las mayores ventajas de este herraje es la poca profundidad que restamos al armario. Únicamente se descuenta el espesor de la puerta que puede ir de 19 a 45 mm.

SUMMARY

This system allows keeping the hanging doors lined up on the same plane. It also permits to manufacture closets of any size, where the fittings are hidden and the subjection can't be seen.

One of the great advantages of this system is that it takes very little depth from the closet. We could say than no more than the thickness of the door that is between 19 to 45 mm.

CONCEPTO FUNCIONAL

Este tipo de construcción permite crear espacios de gran amplitud visual pudiendo exponer los productos de una manera atractiva y sencilla.

Conjunto de paneles y baldas soportados mediante perfiles ocultos de aluminio atornillados a la pared.

Su diseño permite regular las baldas a la altura deseada gracias a la cremallera que incorporan los perfiles.

Las baldas a utilizar son de 30-40 mm de grosor y los paneles traseros pueden tener un espesor de 10 a 30 mm.

El ancho máximo recomendado por módulo es 1,30 m.

La altura máxima del perfil básico es 2,80 m.

El peso máximo recomendado por balda es 50 kg.

El grosor estándar del panel trasero es 10 mm.

SUMMARY

This system creates a model of visual spaciousness being able to display the products in an alternative and simple way.

A collection of panels and shelves supported by slotted aluminium profiles fixed to the wall that remain completely concealed and permit shelf regulation to the desired height.

The shelves thickness is 30-40 mm. and is intended for backing panel thickness from 10 to 30 mm.

The maximum recommended panel width is 1,30 m.

The basic profile maximum height is 2,80 m.

The maximum weight recommended per panel is 50 kg.

The back panel standard thickness is 10 mm.

SISTEMA

UNIX

UNIX SYSTEM

CONCEPTO FUNCIONAL

De gran versatilidad, permite dos tipos de construcciones:
Suelo-Techo ó *Suelo-Pared*

A diferencia de los diseños tradicionales de módulos con costados de madera, este sistema permite una visión global de todos los artículos que se expongan.

La perfilería vertical de aluminio tiene el canal longitudinal en la cara trasera, las tuercas quedan ocultas a la vista y los soportes de la balda poco visibles. Las baldas pueden ser reguladas a la altura deseada.

Las cartelas permiten utilizar baldas para madera o vidrio, pudiendo inclinarse hasta 38°.

Este sistema nos permite recubrir el perfil con los mismos acabados que las baldas creando una integración total entre ambos.

SUMMARY

This system has a great versatility. It permits two types of assembly:
From floor to ceiling or *From floor to wall*

There is a difference with traditional designs, which are manufactured with wooden sides, Unix allows a quick overall view of all the exposed articles.

The vertical aluminium profile has a longitudinal slot on the rear face, the nuts are hidden from view and the shelf supports are barely visible. The shelves can be fixed at any height.

The shelf's brackets allow the use of wooden or glassy material and are able to lean 38°.

This system allows wrapping the profile with the same finishings as the shelves making a complete integration on both elements.

STRUKTURA

CONCEPTO FUNCIONAL

Diseño flexible y versátil, que permite fabricar muebles a medida mediante una perfecta y sencilla unión de perfiles. Pudiendo combinar:

- Tableros de 10-30 mm.
- Vidrios de 6-10 mm.

Mobiliario personalizado, adaptado en cada caso a las necesidades requeridas.

SUMMARY

Flexible and versatile design which allow to create custom furnitures because of the perfect and simple joint between the aluminium profiles.

This system permits to combine:

- 10-30 mm thickness board.
- 6-10 mm glass.

Customized furniture, adapted in each case to all needs.

ASSEMBLY INSTRUCTIONS

CABINAS SANITARIAS A MEDIDA
CUSTOM CUBICLE PARTITION

Posibilidad de suministrar las cabinas totalmente acabadas y preparadas para su instalación incluyendo todos los accesorios necesarios.

La fabricación se realiza con laminado compacto fenólico de un espesor de 12mm con dos caras decorativas y un núcleo negro.

Todas las piezas fenólicas irán con los cantos mecanizados y redondeados, así como los orificios y pretaladros para una mayor facilidad de montaje.

Para el herraje disponemos de perfilería de aluminio, acero inoxidable ó mixto. Todo el herraje de acero inoxidable es calidad AISI304, pudiéndose solicitar AISI316.

Gama de acabados fenólicos:

We can supply fully finished cubicle partition, ready to install including all necessary hardware.

Cubicle partition made by phenolic compact laminate, 12mm thickness with two decorative faces and black core.

All phenolic boards come with mechanized and rounded edges as well as holes and knockouts made for greater flexibility and easy installation.

We have several options for hardware: aluminum, stainless steel or mixed All stainless-steel hardware is AISI304 quality, also AISI316 can be requested.

CONCEPTO FUNCIONAL

LAS MEJORES MATERIAS PRIMAS, EL CONOCIMIENTO ARTESANO DE LOS TRABAJADORES QUE COMBINA LA TECNOLOGÍA MÁS AVANZADA DE NUESTRAS MÁQUINAS, EL DISEÑO EXCLUSIVO, LA BÚSQUEDA CONTINUA DE NUEVOS MODELOS, COLORES Y SOLUCIONES, EL RETO DIARIO PARA MEJORAR LA CALIDAD DE NUESTROS PRODUCTOS.

El marco técnico de aluminio raso muro Minimal se incorpora perfectamente en la pared, y la puerta queda integrada en el entorno creando un diseño que combina lo funcional y esencial. El color de la pared, el papel pintado, los murales y las decoraciones fluyen hacia la puerta sin interrupción. Integrando completamente todos los elementos del entorno.

La reversibilidad del sistema se determina durante la instalación: invierta el marco para definir la dirección (tirando o empujando) simplemente volteando el ala, puede establecer la dirección de apertura, derecha o izquierda.

Equipado con cerradura magnética y con bisagras ocultas que permiten la regulacion en los tres ejes permitiendo una perfecta estabilidad y planitud de la puerta

De forma opcional se suministra una hoja lisa de 45mm de espesor, alveolar fabricada con tablero HDF de 7 mm y sello de calidad AITIM. Bastidor perimetral en madera y rechapado en PVC relacable a 4 lados encolado mediante adhesivo PUR , con refuerzo para cerradura. Fondo poliacrílico uv de gran adherencia (250 g/m2) lo que permite la fácil adhesión de pinturas y lacas.

SUMMARY

THE BEST RAW MATERIALS, THE WORKER'S CRAFT KNOWLEDGE THAT COMBINES THE MOST ADVANCED TECHNOLOGY OF OUR MACHINES, THE EXCLUSIVE DESIGN, THE CONTINUOUS SEARCH OF NEW MODELS, COLORS AND SOLUTIONS, THE DAILY CHALLENGE TO IMPROVE THE PRODUCTS.

The Minimal flush door aluminum technical frame is perfectly incorporated into the wall, and the door is integrated into the environment creating a design that combines the functional and essential. Wall color, wallpaper, murals, and decorations flow into the door without interruption. Completely integrating all the elements of the environment.

The reversibility of the system is determined during installation: reverse the frame to define the direction (pulling or pushing) by simply flipping the wing you can set the opening direction, right or left.

Flush door is equipped with a magnetic key lock and concealed hinges adjustable on three axes, to ensure extra stability.

Optionally it is supplied with a 45 mm thick, consisting on a solid dry wood perimetral frame, with an internal cellular structure, hot pressed with 7mm HDF board and AITIM quality seal and coated with Polyacrylic uv base with great adhesion (250 g / m2) which allows easy adhesion of paints and lacquers.

All the perimeter rabbets are coated with PVC primer film (including the lower one to prevent humidity) glued with PUR adhesive.

CARACTERÍSTICAS DEL SISTEMA RASO MURO MINIMAL + HOJA PRELACADA

CHARACTERISTICS OF THE MINIMAL FLUSH DOOR SYSTEM + PREPAINTED DOOR

- Sistema totalmente reversible pudiendo utilizarse para mano izquierda, derecha y para empujar o tirar.
- Equipado con cerradura magnética y con 3 bisagras ocultas que permiten la regulación en los tres ejes permitiendo una perfecta estabilidad y planitud de la hoja.
- Único sistema en el mercado que al voltear la puerta para cambiar la mano (izquierda o derecha) mantiene siempre la misma holgura en la parte superior del marco quedando la puerta totalmente integrada.
- La hoja suministrada es de 45mm de espesor, alveolar fabricada con tablero HDF de 7mm y sello de calidad AITIM. Bastidor perimetral en madera y rechapado en PVC relacable los 4 lados encolado mediante adhesivo PUR, con refuerzo para cerradura. Fondo poliacrílico uv de gran adherencia (250g/ m2) lo que permite la fácil adhesión de pinturas y lacas.
- Válido para construcción con cartón yeso y mampostería.
- Suministrado con goma perimetral anti-ruido que se ancla al marco.

-Totally reversible system that can be used for the left or right hand and for pushing or pulling.

- Equipped with a magnetic lock and 3 concealed hinges that allow regulation on all three axes allowing perfect stability and flatness of the door

-The only system on the market that when turning the door to change the hand (left or right) always maintains the same clearance in the upper part of the frame, leaving the door fully integrated.

- The supplied door is 45mm thick, consisting on a solid dry wood perimetral frame, with an internal cellular structure, hot pressed with 7mm HDF board and AITIM quality seal and coated with Polyacrylic uv base with great adhesion (250 g / m2) which allows easy adhesion of paints and lacquers. All the perimeter rabbets are coated with PVC primer film (including the lower one to prevent humidity) glued with PUR adhesive.

- Valid for construction with plasterboard and masonry.

- Supplied with anti-noise perimeter rubber that is anchored to the frame.
